Digital Set Top Box

## S610A

Contents

Safety Instruction

To avoid danger of electric shock or damage to the receiver, do not remove the cover of the receiver box. Any servicing should be done by authorized and qualified personnel only.

Refrain from spilling any liquids on the receiver box to avoid damaging the equipment. In the event this happens, kindly unplug box from power source. Do not use or store your receiver in cold, hot, damp or dusty places and keep away from all water sources and liquids.
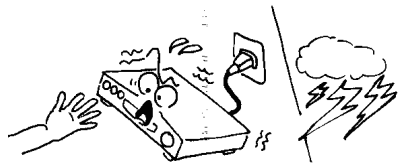

Do not place the receiver box near any cooking applliance. Spills from food being cooked may damage the receiver box. Also, keep receiver box away from any source of heat.
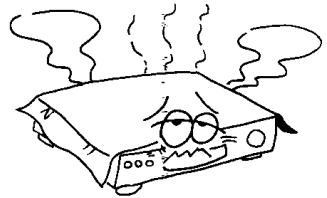

Do not block ventilation holes of the receiver. This may result to overheating and damage the receiver box.
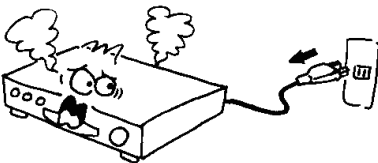

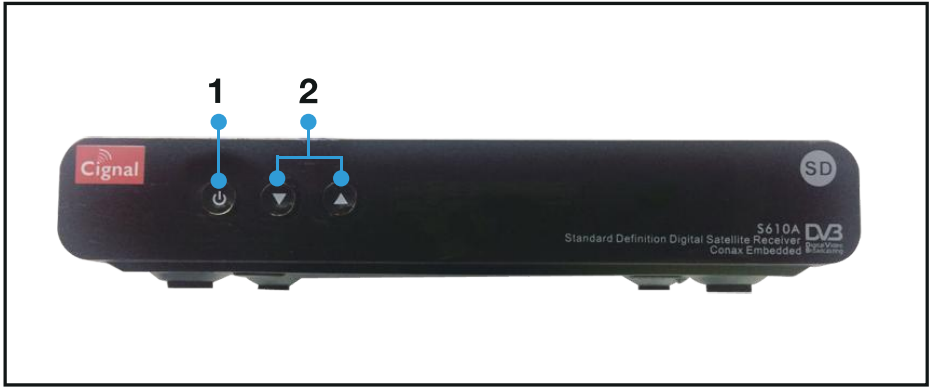

If the receiver unit malfunctions, unplug the unit from the power source.

During thunder storms, refrain from touching the receiver unit. There may be instances of electric shock.

Set Top Box Connections

◆ **DO NOT PLUG the STB into the main power outlet until all the other cables are connected to the STB.**

◆ **Before connecting the cables, you should first connect the LNB IN connector of the STB to the cables from the satellite.**

DISH to LNB IN

TV with RCA Cable

Starting Up
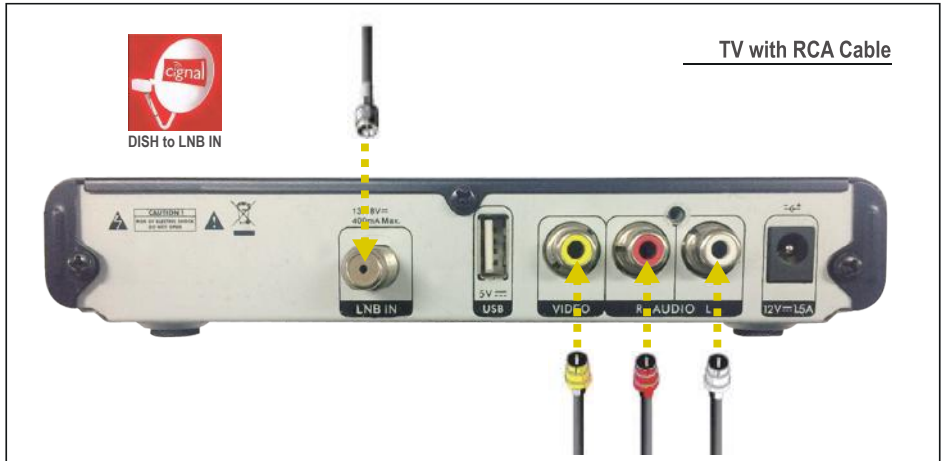

Basic Settings

For newly installed STB, check that all the cables are connected to the STB and perform the setup procedure.
When using the STB for the first time, ensure that all cables are connected, as per the instructions on page 7, and perform the following setup procedure.

WARNING

- Press MENU button to save previously input data and exit the basic settings. If you are exiting the setup without first successfully completing the set-up procedure, no TV and radio channels will be available.
- Make sure that video display setting matches the TV type or else no video will be seen.
  To change the video format, go to SETTINGS > USER >VIDEO OUTPUT.

1. After turning on your TV and STB, follow the instructions on the screen. Press OK button to start the basic setting.
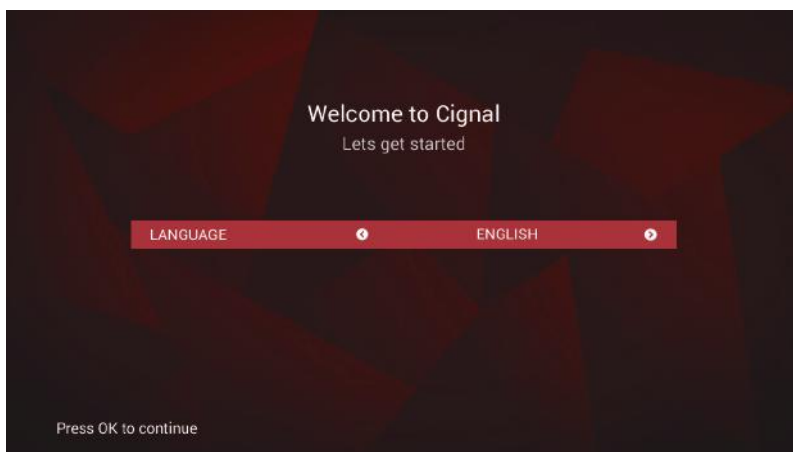

Basic Settings

2. The following LNB Setup menu appears after the welcome screen. Use the ◄ / ► buttons to select the Input Source type and press OK on the RCU.

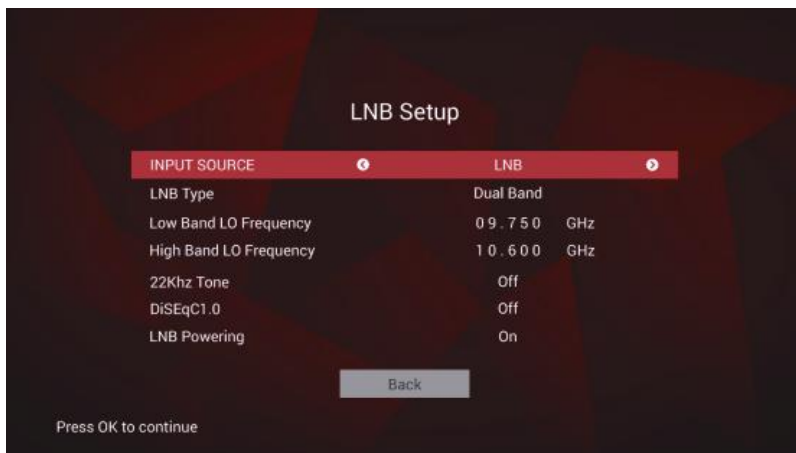

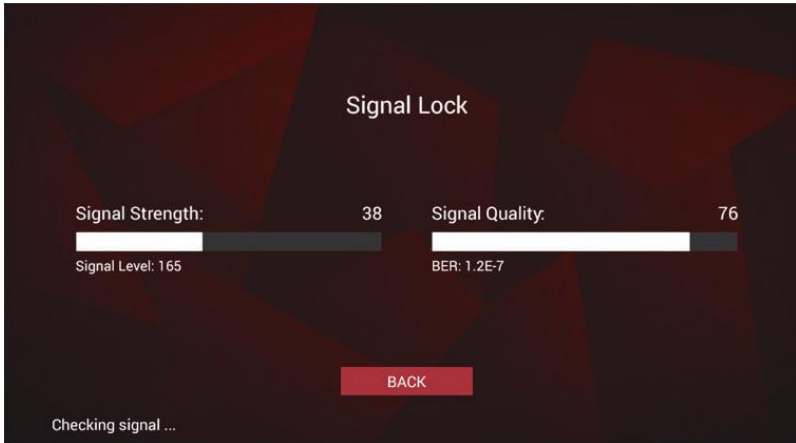

3. Select the required Transporter and press OK on the RCU.

Basic Settings

4. The Signal lock screen displays and the STB will scan all available service channels.

All your TV and radio channels are available for selection in the EPG.

Basic Functions

Electronic Program Guide (EPG)

1. The EPG shows program information on each channel by date and time.
2. To activate the EPG, go to MENU > GUIDE or Press EPG key on the RCU.
3. Channels on display will have their channel numbers & channels are shown at a time.
4. The Listings Grid shows 1 and a half hours' worth of TV listings for the channels shown in the Channel List.
5. Upon entering, the synopsis box on the right side will not be shown.
6. Press the INFO key on the RCU to show the synopsis.

Basic Functions

Channel List

1. To access the Channel List, press MENU then go to LIVE TV. The list of available channels with their respective channel number assignment and channel name are displayed.

2. To see the program synopsis or book a program reminder, select a channel then a prografrom the list and press OK.

Basic Functions

Channel Bar

1. The Channel Bar displays basic information about the channel and its programsl. The Channel Bar is displayed when zapping or by pressing the INFO button while viewing a channel.
2. To access more information about the channel or program, press the INFO button again.
3. Press the EXIT button to remove the Channel Bar or when in the channel information view.

Basic Functions

Bookings

The Set Top Box allows you to manage channel-related events using the Timer Event functions. You can set an alert to inform you when your favorite shows are being broadcasted and turn the STB on or off depending on the schedules that have been setup.

To access this feature, go to MENU > BOOKINGS.

Troubleshooting

Before contacting the service centre, review the list of problems in the Troubleshooting table below. If a solution is not available from the table, please contact the service centre.
